

I'm Hamza Tariq and I'm in my first year of Bachelors of Computer Science. I will be running for the Director of Science Department in the URSU. This is the first time I am running for this position. The reason I am running for this position is to get to know the environment of the URSU and to bring some positive changes to the URSU. Hopefully one day I will be competing for the President of URSU position. I have the urge and passion of bringing some tremendous change at the University of Regina. Every decision I'll take will be based upon the recommendations of my fellow students. Every concern of the student shall be discussed and looked upon. My main objective will be to work in such a way that both the student and the governing body of the university are satisfied. My happiness lies in helping others.
