

Shawn Wiskar is a strong, dependable, and accountable candidate who puts the lives of students first. My platform can be best defined as continuing to target major issues facing students on campus. This year, I want to continue to **rebuild the club registry** and simplify it for students. Student's aren't satisfied by the current club process and after a year of trying to deal with the old system, I will implement a simplified system accessible to all student clubs. This system will be exclusively electronic and expedite the time students must wait to receive their ratification. The second part of my platform is continuing to **represent your voice to the university** administration and leadership. I promise to work with management to ensure that students have more spaces on campus to study and that our library stays open longer to accommodate fair representation in all of their academic endeavours. I will accomplish this by strengthening the relationship of URSU with the faculty deans and university administration. Finally, I would like to work on addressing the economic and food security of students. I promise to work to **strengthen our URSU cares and Student Support programs**. This year, I increased student support funding from \$7000 a year to \$30,000 and helped with the implementation of the URSU breakfast and URSU pantry programs. I believe I am qualified for this position for the following reason: I understand wholly the student experience from my experience as an on campus resident, working as a Resident Assistant, and working as the VP of Student Affairs.
