

Dear Student Body,

I am Barzany Ridha, a hopeful in running for the position of director of Kinesiology. Ever since attending the University of Regina, learning of the opportunities to better this school fired up my passion for change. It is no doubt that we humans have the capacity to constantly improve, better, and recreate ourselves in beneficial ways. As with all of us, our experiences are the instigators of these changes and I intend to use my knowledge of growth in a practical setting like URSU. Through my willingness to work with others, lead when needed, and struggle against adversity, I intend to represent the kinesiology faculty with vigor. My position will only be a mediator to pass on the message of kin students and voice concerns for the betterment of student health. Please consider me for the position, and my need and desire to make change not alone, but together.
