

My name is Kaylee Hayko. I am in my third year of Industrial Systems Engineering here at the University of Regina. Enthusiasm, dedication, and innovation are three of the many qualities that I would bring to the University Senate and the Engineering Council. The achievements I have accomplished to date have allowed me to demonstrate: strong leadership, creative thinking, and an unmatched determination that would make me a valuable contributor to the success of the University of Regina Students' Union.

While in the process of completing my degree at the University of Regina, I have not only made so many amazing friends, but I have broadened my skill-set to include keen organizational skills and strong communication skills, which would be very helpful for these positions. Additionally, while maintaining a high academic average, I am actively involved in intramural sports, dedicate many hours volunteering in my community, and am actively involved with committees such as: the Regina Engineering Students' Society, Regina Regional Science Fair Committee, and University of Regina Students' Union.

I look forward to being a part of the University of Regina Students' Union on both the Senate and the Engineering Council. Thank you for voting!
