

As a fifth year student I have experienced many of the ups and downs the student body has faced. I have been fortunate to have represented the student body on the Senate and University Council last year and look forward to another year of ensuring student voices are being heard by the Administration.

Student fees are at an all time high while funding is rapidly decreasing. We as a student body need to continue the fight and ensure the University puts an end to rising tuition. As a member of senate I will make our voice heard and fight against rising fees.
