

Candidate Profile

I believe the education students deserve a representative on the Board of Directors who has a keen interest in student politics and a strong base of experience and knowledge to draw on when discussing issues that affect them. While serving as the Vice President of Finance on the Education Student Society I've been involved in multiple events and I am present as often as possible in support of what our society does. I aim to combine my position with the ESS and a potential spot on the Board of Directors to help deliver more events and benefits to education students and the University as a whole. I believe students can count on me to represent them strongly within URSU and help ensure that we all see the rewards of what our Students' Union does.
