

My name is Amit Kumar (Aby). If you believe in the following ideas like I do then you should vote for me so that I can represent you and these ideas in the senate.

1. More Exposure – I think students need more exposure of the world outside university. I also had the same problem some time ago, so I think that I understand it very well.
2. Getting designated smoking areas back – Recently, all the designated smoking places were terminated from the university. I do not smoke, but I understand the problem of the people who do.
3. Dynamic approach – I believe in dynamic representation, I think it is not right to decide everything in advance, it is important to grab any opportunity you get. For instance, if I get an opportunity to lobby in support of lower tuition fees then I will do that.
4. Better placements – I am in favour of bringing more employers on the campus as I know this is a big reason why most of us are here. This includes employers providing part-time, full-time, co-op and summer jobs.
5. Making student life more enjoyable – I believe student life should be a time that we should remember throughout our life as the best part of our life.

And yes, all these points are equally important for me and that includes the last one too.
