

My name is Muhammad Usman Khan (preferred name Usman Khan), and I am confident in my abilities to proficiently serve as The University of Regina's Student Union's Vice President of Operations and Finance. I believe that the integration between science and business will be the forefront of developing an auspicious future for all of us. I am approaching my fifth and final year in Environmental Engineering Systems, and I have seen this University make huge improvements in student life, quality of education, and providing students with opportunities for growth. However, quoting my new favourite Marvel movie "Just because something works doesn't mean it can't be improved."

I strongly value transparency, reciprocity, and integrity. My goals, if elected for this position; is greater investment in student education, and integration of minority groups with the larger student body. I want to put the "US" in Usman, I want to be a representative for the people, and abide by providing inclusive programs for the entirety to benefit from. No one should feel misrepresented, or that they are not valued in the student community. We do our best work together; collaboration and diversity are the most valuable assets in growth and development.

I want to base my platform on unity, diversity and inclusion. I invite all those interested in producing legitimate change, please join me in creating it. My Email is Khan286m@uregina.ca, please provide me with any suggestions you have to make Regina a better place for US.
