

My intention in running for this position is largely motivated by my experience as a student and how I can use what I have learned and seen from previous members to enhance the overall student experience. I intend on tackling issues of disengagement through a more direct discussion and as the primary contact point for clubs, I would like to bridge the gap that exists between the students and the governing committees. I believe that URSU's role as a student government is to advocate for students and work in their best interests, and I want to see this done in the best way possible. It is the pursuit of this goal that I chose the position that interacts with students the most.

To better engage students, I plan to increase social media presence through new marketing research roles, as well as having representatives visit more classes. I would also like to create a role dedicated to collecting feedback from students.

I am most focused on the needs of students in the present and their need for an accessible space to go to while on campus, either to study, relax, or connect with other students. That is why I will be advocating for more dedicated study spaces for undergraduate students.

I am confident that I can make a positive contribution to URSU, I have excellent interpersonal skills and broad network of individuals. I look forward to seeing all of you around campus and please feel free to approach me anytime, you'll find I am a very welcoming person.

Sincerely,

Ammad Maken
