

Hi! I'm Harmandeep Singh Deol electing for the position of Vice-President external affairs at the University of Regina this year. It's my third semester at the campus and I'm doing business administration 2 years program. I had done many presentations in the lectures and I'm interested to deal with the other countries to move forward. The thing I'm telling this is that I want to use my confidence and knowledge to help the campus grow. My language skills are brilliant and I found that this is the position where I can put them for use. As the VP for external affairs is all about interacting with new people. I'm from a political background, my father was an ex-MLA and so I have some knowledge to handle these things. In last I just want to know that if I get elected and selected then I will not let the hopes get down.
