Hi I am Hannah (she/her)!

I am running for URSU President because I want students to feel ready to face today, and the future. By using my ideas, skills and determination, I can help shape an innovative community and put people first.

I am a student, but I have many roles in life. I am an advocate, teammate, employee, friend, volunteer, artist, traveler, care-giver, middle child, aunt, and community member. I want to improve the student experience by recognizing the full range of roles in your life.

My relevant qualifications and experiences are:

- Pursuing secondary and post-secondary education in Australia, and currently studying Political Science and International Business at the University of Regina.
- Involvement with many community and campus groups.
- Volunteering on campus and in my community.
- Representing Regina, Saskatchewan, and Canada at national, and international forums, and conferences.
- Undertaking courses and training outside of my university classes in technology management, digital citizenship, public speaking, inclusion and political participation.
- Serving customers in part-time and full-time hospitality and retail roles.
- Communications and customer service work at SaskPower.
- Communications, policy, strategy and performance work at the Government of Saskatchewan.

My platform has four main areas: review URSU strategy to serve students efficiently, promote inclusion practises, empower students by creating a culture of innovation, and advocate for issues faced by students inside and outside of the classroom.

*Vote for Hannah on March 17th and 18th to Put People First!*
