

Hello everyone,

My name is Oghenerukevwe Erifeta but I mostly go by Rukky. Most of you know me from music, as a singer-songwriter, or YouTube, some of you know me from the countless volunteer opportunities I have been part of here on this campus; three years as an **Ambassador** with the **Student Success Centre**, two years as an **Ambassador leader** with the same team, recently as the **President** of the **Nigerian Students Association**, and in charge of **Videography/pictures** with the **Science Student Society**. From movie nights, Welcome weeks, Mentorships, Tour training, Orientation weeks, UR Naija Fest, Galas and Dinners; I have enjoyed and found it a great opportunity to serve this campus community. If you do not know me, I am a regular girl with a delusional mission to change the world for better, and I intend to continue that work in an even bigger way through this platform by running to be your **VICE PRESIDENT EXTERNAL AFFAIRS** in the 2023 URSU ELECTIONS.

On getting elected by your vote, I will be:

- Spreading student involvement and engagement to all members of our campus community, international, domestic, graduate students and undergraduate students; and integrating our unique cultural, racial, religious... diversity into these events to continue the multicultural legacy of Canada here in our student body.
 - Organising events opportunities for students to interrelate and connect with each other.
 - Planning out effective campaign and marketing strategies to promote the resources and events provided by the Student union so no student misses any of the resources that are being paid for.
 - Working directly with student societies and external organisations to promote and support their active student interaction, involvement and engagement opportunity agendas.
- Campaigning for, Lobbying with and advocating to the University, Provincial and National government, as well as the Student Union board to execute the following projects:
 - Provision of more mental health care services and professionals on campus, resulting in a less rigid and tedious accessibility processes and shorter wait periods. (while actively promoting the services that do exist)
 - Providing more student-based tutoring options for students in need, beyond just Mathematics and English to several other faculties and disciplines (while actively promoting the services that do exist)
 - Provision of more financial aid, loans and grants to international students and every member of the student union
