

As a candidate for the Faculty Board of Engineering, my vision is rooted in the belief that a thriving academic environment is built on the pillars of collaboration, innovation, diversity, and opportunity. My commitment is to foster a culture that not only encourages teamwork and creativity but also ensures that these values permeate every aspect of our engineering program. Understanding the diverse backgrounds and unique perspectives of our student body, I am dedicated to advancing diversity, equity, and inclusion within our curriculum. This commitment is not just about creating an inclusive environment; it's about enriching our community's learning experience and preparing our students to be thoughtful, inclusive leaders in the engineering field. Recognizing the importance of practical experience in an engineer's education, I aim to expand the accessibility of co-op programs. By offering targeted workshops and seminars, I plan to equip our students with the tools and knowledge they need to succeed in these valuable opportunities. Moreover, I believe in supporting our students' ambitions through increased scholarship opportunities. It's essential to streamline the process for exploring these financial resources, ensuring that every student has the opportunity to pursue their academic and professional goals without financial barriers.

In essence, my candidacy is driven by a desire to build a more collaborative, inclusive, and opportunity-rich engineering faculty, preparing our students not just for the challenges of today but for the innovations of tomorrow.
